The Tropical Agriculturist

The Agricultural Journal of Ceylon

Founded 1881.

Published by
The Department of Agriculture,
Peradeniya.

Vol. XCVIII

Containing Numbers 1 to 4,
January to December, 1942.

J. N. A 47845-905 (2/45)

INDEX

Vol. XCVIII., January to December, 1942.

Number	Month	Pages.
1	January-March	1– 66
2	April-June	67–140
3	July-September	141–218
4	October-December	219–294

Note.—Please see Errata in the April to June, 1943, number of this journal Vol. XCIX drawing attention to alteration of the numbering of the pages in numbers 2, 3, and 4 above, *i.e.* for the period April to December, 1942.

A

Agricultural cattle and beef trade (Editorial), 67
Animal disease return, 65, 137, 211, 212, 291
Annual cropping in the tropics (Editorial), 141
Ash from coconut oil palm waste products as a substitute potassium fertilizer, 43

B

Bandakka, the nature of the Mosaic Disease of (*Hibiscus esculentus* L.), 16
Beef Trade and agricultural cattle (Editorial), 67
Board of Agriculture minutes, 277
Breeding of dairy cattle for the tropics, experimental, 262

C

Cassava, cultural experiments with (*Manihot utilissima* Pohl)—1, 143
Cattle, beef trade and agricultural (Editorial), 67
Cattle for the tropics, experimental breeding of dairy, 262
Central Board of Agriculture, minutes of, 277
Chemical and physical characteristics of the soils of adjacent contrasting vegetative formations, 81
Citrus aurantifolia Swingle, and its products, 123
Coconut Research Scheme, Minutes, 60, 205
Coconut and Oil Palm waste products as a substitute potassium fertilizer, ash from, 43
Coconut palms, note on physiological stem bleeding of mature, 97
Competition, departmental egg laying, 1941, 25
Competition, 1942, departmental laying, 260
Crop production, soil problems in tropical, 195
Crop, increased yields following harrowing of growing rice, 106
Cropping in the tropics, annual (Editorial), 141
Cultural experiments with cassava (*Manihot utilissima* Pohl)—1, 143
Cultivation and increased production, soil, 270

D

Departmental laying competition, 1942, 260
Dairy cattle for the tropics, experimental breeding of, 262
Dietary, war time—substitutes in the event of a shortage of rice, 13
Diplodia, ear rot of maize, 176
Diseases of *Stachytarpheta*, some virus, 8
Disease of bandakka, nature of Mosaic (*Hibiscus esculentus* L.), 16
Diseases tomato and how to control them, 198
Disease new to Ceylon—"White Spot" of turnip, 235

E

Ear rot of maize, diplodia, 176
Economic entomology for South India, hand book of (Review), 63
Ecology of the wet evergreen forests of Ceylon, the soils and, 70, 153
Editorial, 1, 67, 141, 219
Egg laying competition, departmental, 1941, 25
Entomology for South India, handbook of economic (Review), 63
Experimental breeding of dairy cattle for the Tropics, 262
Experiments with cassava, cultural, 143

F

Fertilizer, ash from Coconut and Oil Palm waste products as substitute potassium, 43
"Farming Mixed" in the tropics, a definition of the term, 125
Forests of Ceylon, soils and ecology of wet evergreen, 70, 153

G

Growing rice crop, increased yields following harrowing of the, 106
General public and paddy grower (Editorial) 219

H

Handbook of economic entomology for South India (Review), 63
Harrowing of the growing rice crop, increased yields following, 106
Hibiscus hybrids, the production of, 237
Hibiscus esculentus L., nature of the Mosaic disease of bandakka, 16
Horticulture and Plantation Crops, Imperial Bureau of (Review), 210
Horticultural Abstracts Volumes I–X., 1931–40, index to (Review), 210
Hybrids, the production of hibiscus, 237
Hydnocarpus Oils in Ceylon, 2

I

Increased production, soil cultivation and, 270
Index to Horticultural Abstracts Volumes I-X., 1931–40 (Review), 210
Items of interest in the activities of the Royal Botanical Gardens, Peradeniya, 28, 108, 177, 244

K

Kagdi Limbu (*Citrus aurantifolia*, Swingle), and its products, 123

L

Laying competition, 1942, departmental, 260
Lesson of the Paddy Bug (Editorial), 1
Lime, studies on propagation of seedless Tahiti, 149

INDEX

M

Maize, the lack of phosphate in S. W. Zone soils, a chaty experiment with, 102
Maize, diplodia ear rot, 176
(*Manihot utilissima* Pohl)—1. Cultural experiments with cassava, 143
Mature coconut palms, note on physiological stem-bleeding of, 97
Meeting of the Board of Tea Research Institute, the minutes of, 54, 130, 133
Meeting of the Board of Management, Coconut Research Scheme, minutes of, 60, 205
Meeting of the Rubber Research Board, minutes of, 57, 135, 202, 208, 288
Meteorological Report, 66, 138–140, 213–18, 292–294
" Mixed farming " in the Tropics, a definition of the term, 125
Mosaic disease of Bandakka, the nature of (*Hibiscus esculentus* L.), 16

O

Oils in Ceylon, hydnocarpus, 2
Oil Palm waste products as a substitute potassium fertilizer, ash from coconut and, 43

P

Paddy, yield and cost of production at Dept. Paddy Seed Stations, 194
Paddy grower and the general public (Editorial), 219
Paddy Bug, the lesson of (Editorial), 1
Patna burning with particular reference to pasturage and wet patnas, 221
Pasturage and wet patnas, patna burning with particular reference to, 221
Phosphate in Ceylon S.W. Zone soils, the lack of, 102
Physiological stem bleeding of mature coconut palms, note on, 97
Plantation Crops, Imperial Bureau of Horticulture and (Review), 210
Potassium fertilizer, ash from coconut and oil palm waste products as a suitable, 43
Propagation of seedless Tahiti Lime, studies on, 149
Products, Kagdi Limbu (*Citrus aurantifolia*, Swingle) and its, 123
Production, soil cultivation and increased, 270
Production of hibiscus hybrids, 237
Products as a suitable potassium fertilizer, ash from coconut and oil palm waste, 43

R

Royal Botanical Gardens, Peradeniya, items of interest in the activities of the, 28, 108, 177, 244
Rubber Research Board, minutes of, 57, 135, 202, 208, 288
Rice crop, increased yields following the harrowing of the growing, 106

S

Seedless Tahiti Lime, studies on propagation of, 149
Soils and ecology of wet evergreen forests of Ceylon, 70, 153
Soils, studies on Ceylon, 81
Soils, the lack of phosphate of Ceylon S.W. Zone, 102
Soil problems in tropical crop production, 195
Soil cultivation and increased production, 270
Stachytarpheta, some virus diseases of, 8
Stem bleeding of mature coconut palms, note on physiological, 97
Studies on Ceylon Soils, 81
Studies on propagation of seedless Tahiti Lime, 149

T

Tea Research Institute, minutes, 54, 130, 133
Tropics, " Mixed Farming " in the, a defenition of the term, 125
Tropics, experimental breeding of dairy cattle for the, 262
Trade, and agricultural cattle, the beef (Editorial), 67
Tropics, annual cropping in the (Editorial), 141
Turnips " White Spot " of, a disease new to Ceylon, 235
Tahiti Lime, studies on propagtion of seedless 149
Tomato diseases and how to control them, 198

V

Virus diseases of *Stachytarpheta*, some, 8

W

War time dietary—Substitute in the event of a shortage of rice, 13
Wet patnas, patna burning with particular reference to pasturage and, 221
" White Spot " of turnips, a disease new to Ceylon, 235

ILLUSTRATIONS APPEARING IN Nos. 1-4, VOL. XCVIII.

	Facing Page
Diseased *Stachytarpheta Jamaicensis* plant showing mosaic (yellow blotch) symptoms	8
"Rosette" disease symptoms on *Stachytarpheta Jamaicensis* ..	10
Mature Bandakka plant affected with mosaic	17
Bandakka seedling affected with mosaic	18
Showing typical patana (grass) land in the foreground with Low Forest in the Background at Hakgala ..	82
Showing patana land interspersed with forest at Hakgala	82
Showing a soil profile of typical patana land near Hakgala	82
Showing a profile of a typical wet patana soil at Nuwara Eliya ..	83
Showing typical kekilla (fern) land interspersed with jungle and rubber on the west bank of gin-ganga ..	83
Showing kekilla (fern) land in the foreground and rain forest (mukalana) in the background (Galle District) ..	84
Showing typical high jungle at Dambulla in the Dry Zone ..	85
Showing medium jungle and scrub at Minneriya	86
Showing typical damana land at Minneriya	87
Sub soil series	103
Wooden Harrow	106
Illustrating the habit of plants derived from cuttings placed vertically (D_1) & horizontally (D_2.)	144
Seedless Tahiti Lime on Rough Lemon Stock (Normal spreading habit of growth)	150
Seedless Tahiti Lime on Rough Lemon Stock (Erect habit of growth of budsport)	150
Seedless Tahiti Lime on Sour Orange Stock	150
Seedless Tahiti Limes	151
13 Plates illustrating article on the "Soils & Ecology of the Wet Evergreen Forests of Ceylon" appearing in number 2 & 3 ..	*at end of Vol 3*
Plate 1. Map showing regional distribution of the wet evergreen forests ..	„
Plate 2. Map showing Zonal distribution of annual average rain fall ..	„
Plate 3. Curves of average monthly rainfall distribution for 12 typical stations ..	„
Plate 4. Profile diagrams	„
Plates 5 to 8. Series I, II, III sub-series i to iii, IV, V, & VI.	„
Plate 9. The *Dipterocarpus* Community, Madakada forest, Western Province ..	*at end of Vol 3*
Plate 9. The *Dipterocarpus* Community, Kottawa forest, Galle District ..	„
Plate 10. The *Dipterocarpus* Community, Madakada forest, Western Province ..	„
Plate 10. The *Mesua-Doona* Community, Delwella Forest, Ratnapura District	„
Plate 11. The *Vitex-Wormia—Chaetocarpus—Anesophyllea—(Dillenia)* Community—Ingiriya forest, Western Province ..	„
Plate 11. The *Myristica—Semecarpus—Mangifera* and other softwood species Faciation. Kottawa forest, Galle District ..	„
Plate 12. The *Vitex—Wormia-Chaetocarpus—Anisophyllea* Community Thandikele forest, Ratnapura District ..	„
Plate 12. The *Aporosa—Chaetocarpus-Vitex-Anisophyllea* Low Jungle Community. Karawitakande forest, Ratnapura District	„
Plate 13. *Scrub Jungle Community*—Yagirale forest, Kalutara District ..	„
Plate 13. Portion of Kanneliya forest, Galle District	„

	After Page
Bopatalawa Patanas. Patana burnt on August 8, 1942 (mid distance) ..	232
Bopatalawa Patanas. Patana burnt on August 8, 1942, abutting in front on on area burnt earlier in the year ..	232
Bopatalawa Patanas. Near view of area burnt on August 8, 1942 ..	232
Bopatalawa Patanas, Unburnt (recently) patana on near side by the stream ..	232
Bopatalawa Patanas	232
Bopatalawa Patanas. Unburnt (recently) patana on hillside	232

	Facing Page
Bopatalawa Patanas, Unburnt (recently) patana with the grass in the foreground cut off to show the undecayed, fibrous layer on the ground ..	233
Bopatalawa Patanas. Regrowth of grass two months after cutting of patana	233
Turnip leaves showing symptoms of "White spot" disease ..	235
Fresh spores of *Cercosporella brassicae* (Fautr & Roum) von Hochn. in water (Camera lucida drawing x 575) ..	235
